Robby Cruz

Full Stack Developer | Frontend Developer | Backend Developer
Quezon City, Metro Manila, Philippines | cruzrobby200224@gmail.com | +639081672123 | Linkedin | Github

Personal Summary

Full Stack Developer with 2+ years building responsive web apps and PWAs using React.js, Next.js,.NET, and AWS Serverless. Experienced in frontend, backend, database, DevOps and leading small teams.

Professional Experience

Junior Software Engineer | Activasia Inc. | Hybrid | Oranbo, Pasig City | May 15, 2025 – Present

- Developed and maintained frontend, backend, and database systems using React.js, Next.js, Mantine UI, and Serverless architecture.
- Managed AWS infrastructure, production deployments, Git workflows, and environment configurations to ensure reliable releases.
- Designed, developed, and delivered new features and system enhancements based on business requirements.
- Debugged production issues, refactored legacy code, optimized performance, and contributed to system architecture improvements.
- Collaborated with cross-functional teams to resolve issues and mentored developers through code reviews and technical guidance.

Full Stack Developer | Unlimited network of opportunities | Hybrid | West Avenue, Quezon City | September 18, 2024 – May 14, 2025

- Designed and developed responsive landing pages and intuitive UI/UX for customer-facing and internal systems.
- Developed new systems and features while optimizing existing applications for performance, usability, and conversions.
- Troubleshot, debugged, and resolved system issues to improve reliability, compatibility, and overall performance.
- Collaborated with management, QA, business analysts, and cross-functional teams to prioritize work, validate features, and deliver business requirements.

Junior Full Stack Developer | Simplified Business Consultancy | Onsite | Feria, Quezon City | August 1, 2023 – September 3, 2024

- Developed a full-stack Progressive Web Application (PWA) using Blazor WebAssembly and .NET 8, implementing secure authentication and the MVVM architecture.
- Designed a responsive, scalable application, ensuring quality through testing, debugging, and modern development best practices.
- Collaborated with clients to present features, gather feedback, and deliver solutions aligned with business requirements.
- Led project coordination, documentation, and team collaboration using GitHub and Notion to ensure successful project delivery.
